triticonazole	Dollar Spot/Brown Patch Disease	NA	.370	Product Rotation Curative Application
propiconazole	Dollar Spot/Brown Patch Disease/Snow Mould	NA	1.532	Product Rotation Curative Application
fludioxonil	Snow Mould	NA	.212	Product Rotation

ANNUAL REPORT - CLASS 9 PESTICIDE USE for the year 2019

Golf Course:

Keystone Links Golf & Country Club

In 2019 we continued to implement the program of chemical use reduction from 2018 season. Notably we used a combination of intense monitoring and cultural control via mowing strategies to regulate cutworm populations. Product rotation allowed us to maintain disease control on greens while avoiding resistance development. Staff were encouraged to report pests when seen and participate actively in ongoing scouting to supplement weekly scouts by IPM Agent. Close attention was paid to thresholds when the decision was made to use chemical controls. This program will continue next season.
